

PROMEDIVET

Born out of our
commitment to animals

Who is Promedivet?

A business founded because we care about all animals

PROMEDIVET deals with the production and distribution of **100% natural, plant-based** animal health products.

We are proud to be a company that has developed a lot of plant based products in the last 25 years in a constantly changing and growing market.

Promedivet consists of 75 people, including laboratory technicians and veterinarians who have extensive experience in this field.

Together, we created a wide range of products: from veterinary cosmetics to food supplements and biocides.

We engage in collaborative research with a number of academic institutions on a variety of projects related to our products, with the objective of publishing the results in national research papers.

Our goal

Our goal is the successful use of medicinal plants in veterinary medicine and animal care.

The two criteria that served as a solid foundation for our company and that we have always used as a guideline: the use of high quality raw materials and user comfort.

Approximately 50 different species of plants are used, with the specific plant parts selected according to the desired effect.

Our products

We receive attention from Promedivet through specially formulated products, like cosmetics, complementary feed, antiparasitic products and adjuvants!

Promedivet provides me with petcare products, including cosmetics and supplements tailored to my needs!

(Packaging -
Bottles x 200/250 ml & 1/5 L)

Perfume and roll-on balm

(Packaging -
Bottle x 10 ml - roll-on balm
Bottle x 100 ml - perfume)

Sprays

(Packaging -
100/150/500 ml & 1 L;
Bottles and canisters)

Liquids

(Packaging -
20/30/100/200/500 m & 1/5 L;
Bottles and canisters)

Powders

(Packaging -
20/50/140/700 g;
Bottles and canisters)

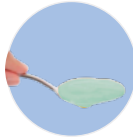

Types of products we can manufacture

Tablets

(Packaging -
Bottles with 0.2/1/5 g tablets

Suspensions

(Packaging -
Bottle x 150 ml & 1 L)

Granules

(Packaging -
Bucket x 3/7/8 kg)

Our hydroalcoholic herbal extracts have been subjected to efficacy studies with the following results:

Herba-Top Anthelmintic - Reduction of the average number of EPG (parasitic elements - eggs - per gram feces) after 7 days:

- 92.1% for *Strongyloides spp.*;
- 78.9% for *A. galli/H. gallinarum*;
- 53.2% for *Capillaria spp.*

Herba-Top Ecto Plus - Mite reduction - *Dermanyssus gallinae*

- 68.93% after the first treatment
- 70.91% after the second treatment

Ectocid Natural Spray - Reduction of the number of mallophaga lice in hens and goats, respectively the number of positive animals

- 75.7% no. of lice/bird and 50% no. of positive birds - administered 3 times at 14 days interval
- 98.62% no. of lice/bird and 70% no. of positive birds - administered 3 times at 7 days interval
- 96% no. of lice/goat

Herba-Top Tricho Plus - Reduction of the average number of EPG (parasitic elements - eggs - per gram of feces):

- 91.23% for *Capillaria spp.*
- 69.8% for *Eimeria spp.*

Herba-Top Cocci Plus - Reduction of LS (lesion score), MRE (multiplication rate of *Eimeriei spp.*) and increase of weight gain

- 79.22% - 91.86% MRE compared to positive control group
- 42.86 - 50.0% LS compared to control group
- 13,143 g/day weight gain compared to untreated hatchery chickens after 3 days
