

Pitching Session: For a Greener Planet - Showcase of SIT Alumni Ventures

28 mai 2021 | 14:00 - 15:00

Breeze Technologies is a technology leader for air quality sensors, air quality data and air quality analytics software. The company leverages the internet of things and artificial intelligence to help cities and businesses create better clean air action plans and a more liveable environment.

Breeze Technologies was founded in 2015 and has been recognised as one of the most promising European start-ups by the European Parliament and the European Commission. Breeze's founders have been included on the Forbes 30 Under 30 list and have received numerous awards, including from the German Federal President.

Robert Heinecke is an entrepreneur, futurist thinker and smart city expert. He is the CEO of Breeze Technologies, a German industry leader in air quality sensors, data and analytics, which he co-founded in 2015. Before that, Robert worked for multiple international consultancies in strategy and digitalisation. He holds degrees in Computer Science and IT Management & Consulting. Robert is on the "Forbes 30 Under 30 Europe" and "Capital 40 Under 40" lists, a member of the European Commission's "Young Leaders of Industry" sustainability panel and a member of the scientific advisory board of the Federal Association for Electric Mobility in Germany.
