Hackett Group

95% of respondents believe advances in Gen AI signify a new era of enterprise intelligence

Accenture's 2023 Technology Vision

# IVA Powered by Generative AI

## Available IVA Gen AI Use Cases

- ✓ **Guided Supplier Creation:** IVA guides you to create a supplier and searches the web to enrich the supplier profile with accurate information.
- ✓ **RFP Proofreader:** IVA assists you in proofreading and improving RFP content (e.g., describing the process, providing an overview of the project)
- ✓ **Mass Communication Assistant:** IVA assists you in crafting communications to suppliers based on simple instructions
- ✓ **Category Intelligence Assistant:** IVA researches a specific category to compile an intelligence report based on impact, risk and recommended actions.
- ✓ **Contract Summarization:** IVA instantly summarizes a contract document in a selected language pulling key obligations, risk and metadata.
- ✓ **Legal Assistant:** IVA acts as a legal assistant to help write or expand clauses to include specific concepts or language.
- ✓ **Improvement Plan Assistant:** IVA summarizes a supplier performance assessment and instantly generates an improvement plan with actions, KPIs and more.
- ✓ **Questionnaire Assistant:** IVA makes it easy to create a draft questionnaire based on simple instructions and configure that within a campaign.
- ✓ **Chat With Your Documents:** IVA can instantly answer questions regarding a document, pull relevant information out, summarize and more.

## Build Your Own Gen AI Use Cases

- ✓ **Leverage IVA's Conversational UX**  
Use a set of simple, no-code tools and framework to create your own conversational use case with IVA, powered by Gen AI. Create your own prompts and follow-through actions to suit your business needs.
- ✓ **Design Gen AI-Powered Features**  
With **Ivalua's Design Mode**, our no-code/low-code capability, organizations have an intuitive configuration layer that allows authorized users to design and test out innovative concepts leveraging the power of Generative AI.
