

SUNMI
BloT for Business 4.0

Hello
SUNMI

About SUNMI

SUNMI is leading the move to Android for business digitization solutions through attractive business IoT devices and End-to-End platform. Focusing on R&D and innovation, SUNMI product lines including CPad, Interactive Display, Payment and Mobile Terminals, Desktop Terminals, Kiosks among others are recognized by customers for design, quality and well performance.

SUNMI's products and solutions have been successfully implemented in retail, food & beverage, healthcare, services and other businesses large and small, empowering clients in more than 200 countries, regions and territories.

Investors

SUNMI has successively obtained strategic investments from Xiaomi Group, Meituan, SCGC, Lightspeed China Partners, ABC International, Ant Group and Jiashan State-owned Assets Investment.

Globalization and Localization

SUNMI operates with a strong global footprint, boasting more than 15 overseas branches spreading across five core regions: Asia-Pacific, Europe, North America, Latin America, Middle East and Africa. In partnership with over 66,000 ecosystem partners worldwide, we co-create comprehensive digital solutions tailored for industries such as retail, F&B, finance, healthcare, and services. Through our global presence and localized service offerings, we powerfully boost offline businesses towards seamless digital transformations.

Global + Local = Glocal

The world is going digital, SUNMI provides local digital transformation with a global vision and the capital, technologies, and talent across the globe to realize localization to make business more efficient.

SUNMI devices have been greatly improved in usability thanks to AI technologies applied to the recognition of multiple documents, items with or without labels, etc.

Use your ID as your account.

Access SUNMI cloud and terminal services in an easy, convenient and secure way. Biometric ID also is available.

SUNMI DMP

SUNMI Device Management Platform

Global Cloud

Local Cloud

Private Cloud

Features

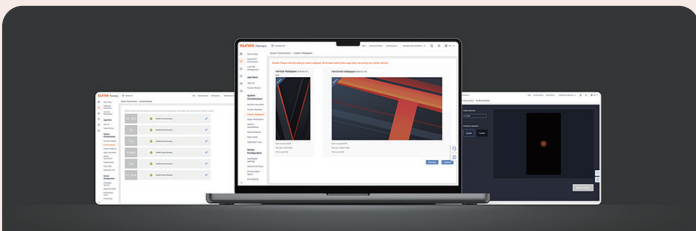

Remote Assistance

Reimagine your aftersales service: quickly find and solve device problems with no geographic restrictions. Compatible with all types of SUNMI devices.

Private Cloud Deployment

Deployed to customer specified servers, TMS is a device management system built for the finance, logistics and healthcare industries, and many more.

Personalized Configuration

Brands, permissions, functions, and visibility can all be configured from DMP to take effect in fleets.

App Distribution

Make your apps quickly available to millions of devices with this top-notch app store for business.

Global network topology. Quick, stable and secure.

Dynamic Acceleration Via CDN

Provide quick and stable network access worldwide with CDN acceleration and optimized edge nodes by fetching contents from a nearby edge through smart dispatch.

Dynamic Capacity Expansion

We adopt a scalable architecture to support dynamic capacity expansion, supporting tens of millions active devices everyday.

Classified Information Protection

Level 2 information protection to secure important information, resources and systems.

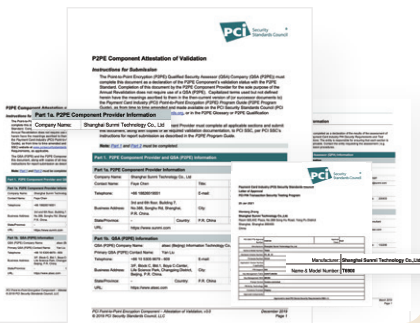

RKI

SUNMI RKI is designed for secure, efficient and convenient key injection.

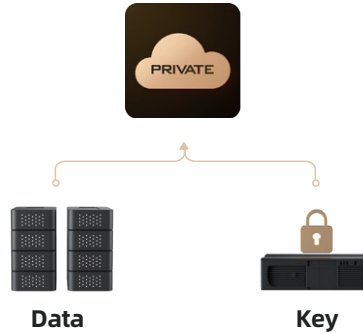

Features

PCI Certified

Support private deployment

Support key automatic download

Advantages

Reduce operating costs

Faster and more secure

The system is updated in time based on PCI specifications

Scenarios

First injection

A key needs to be injected onto a payment terminal before a merchant can use it.

Key update

Key update usually happens after a terminal is resold.

Re-injection

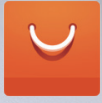

A key re-injection is needed if the key injected was removed due to a tampering or rooting.

Different requirements supported

Support DUKPT & MK/SK

Support Symmetric & Asymmetric

Support Customized KSN

SUNMI App Store

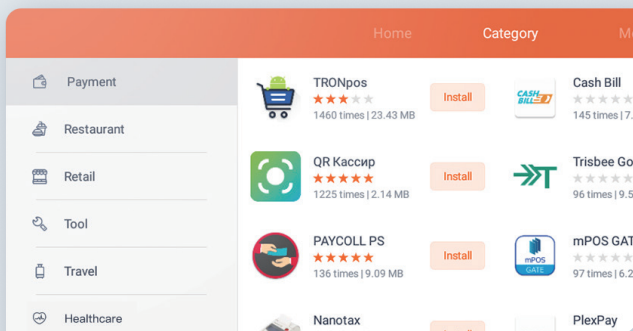

Secured, Flexible and Economical. Publish your apps and build your customized App Store.

Our Clients Around the World

SUNMI's products and solutions have been successfully applied in scenarios in the retail, Food & Beverage, Services, healthcare and other businesses large and small, empowering clients from all walks of life in more than 200 countries and regions.

Retail

Digital transformation is revolutionizing global retail. Discover how SUNMI's third generation smart IoT solutions are transforming retail environments, boosting operational efficiency, and elevating the consumer shopping experience.

Focused on digital solutions for chain restaurants.

“SUNMI is a trusted partner. Their powerful products and expert support were crucial to our project's fast and successful launch.”

—CEO of Rydeen Taojie

SUNMI Products Used

CPad

Applications

Integrates expiry management, online orders, store operations, DingTalk, cloud training, and inventory.

Value

Cutting extra devices and costs, ensures food safety compliance, even for resealed items, enables quick bulk deployment with preloaded and customized systems.

A sports retail chain from Poland.

“During peak hours, the checkout counters used to have long lines. Now, with customers placing orders themselves via Flex, customers are much more satisfied.”

—Store Manager

SUNMI Products Used

FLEX 3

Applications

Ordering and checkout, SoftPOS transactions, and receipt printing.

Value

This digital one-stop shopping upgrade eases checkout pressure, cuts wait and pickup times, and boosts both store efficiency and customer experience.

Retail

A world-leading membership-based warehouse chain supermarket.

“In the past, there were always long queues at the checkout counters. Since we introduced the Sunmi solution, the entire front-of-house operation has become well-organized.”

—Costco staff

SUNMI Product Used

T3 PRO, Blink

Applications

Cashier checkout, integrated payments, receipt printing, order management, membership marketing.

Value

Improve ordering efficiency, reduce waiting time in queues, and enhance the customer experience.

One of the top three bakeries of Bangladesh.

“When we saw the SUNMI D3 MINI and V3 MIX, we immediately decided to upgrade our in-store equipment to SUNMI's third generation products. The quick deployment was very convenient and significantly improved the operational efficiency of our chain stores.”

— A procurement manager,
Cooper's Bakery

SUNMI Products Used

D3 MINI, V3 MIX

Applications

Ordering and checkout, display of delivery orders, SoftPOS transactions, and receipt printing.

Value

Helped chain brands manage multiple stores easily, reducing customer wait times.

Retail

SnappRetail

One of the largest retail SaaS startups in Pakistan.

"The integrated solution we developed with SUNMI has helped small and medium community retailers in Pakistan with digital transformation, enabling functions like ordering and checkout, inventory counting, delivery order management, mobile recharge, and SoftPOS payments. This has introduced more business models and revenue streams for small business owners, serving as an excellent market example in the region."

— A solution manager, SnappRetail

SUNMI Products Used

D3 MINI, V3 MIX

Applications

Ordering and checkout, display of delivery orders, mobile recharging, SoftPOS transactions.

Value

Empowered small and medium businesses with digital transformation to increase revenue and enhance shopping experiences in neighborhood retail.

Bansistemas is a distributor in the Central America and Caribbean region.

"The P3 MIX is used for self-checkout, supporting multiple payment methods such as QR code, NFC, and credit cards, enhancing the traditional customer in-store shopping experience. It addresses all self-service needs in one device, reducing customer wait times by 50% and lowering labor costs for merchants by 30%."

— A software manager, Simplit POS

SUNMI Product Used

P3 MIX

Applications

Self-service checkout, product barcode reading, display of unit price; QR code, NFC, and credit card payments are supported.

Value

Reduced wait times, sped up checkout, and improved store operational efficiency.

Retail

PERFECT DIARY

A well-known internet beauty brand.

“The SUNMI T3 PRO fully leverages the advantages of smart terminals in stores, offering capabilities like in-store pickup, local delivery, and a model where items ordered in-store are distributed by the warehouse with profits split on the backend. It draws traffic from multiple channels to the store, bridging the gap between online beauty brands and offline consumers.”

— Branding & Marketing Department, Perfect Diary

SUNMI Product Used

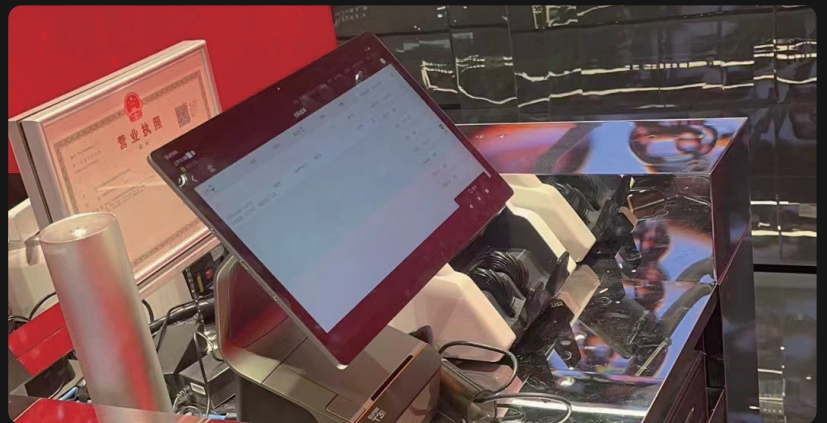

T3 PRO

Applications

Checkout, inventory management, data analysis.

Value

Data-driven store management decisions were made possible by digital technology and multi-dimensional business data.

Healthcare

SUNMI has reached in-depth cooperation with many hospitals. Its 3rd generation products of IoT products have been used in self-registration, patient information filing and medical data tracking and management.

An end-to-end integrated digital pharmaceutical solution provider for the healthcare industry.

“The SUNMI D3 PRO boasts a sleek metal design and innovative extendable modules, paired with the Yaozhizhui Outpatient Management System. This integration creates a comprehensive workstation for doctors, enabling them to utilize the outpatient system without needing computer skills. The large buttons and full-touch screen facilitate easy interaction, allowing users to achieve system proficiency in just 3 minutes and transition smoothly from traditional handwritten prescriptions.”

— A clinic owner

SUNMI Products Used

D3 PRO, FT2, Handheld barcode scanner

Applications

Queue management, consultation and prescription services, medication dispensing, and nursing services for clinics.

Value

Helped clinics implement digital outpatient operations, improving patient service efficiency.

Food & Beverage

SUNMI's third-generation smart IoT products offer comprehensive digital solutions for small and medium-sized food and beverage businesses, streamlining ordering, payment, and food delivery services.

South Korea's No.1 distribution company.

“The tableside stand offers an excellent experience for customers. The built-in power bank is highly convenient, keeping the entire tabletop neat and organized.”

— KO YOUNG MIN SK Channel Division

SUNMI Products Used

CPad

Applications

Table-side self-ordering, Backend management, Order tracking, centralized charging.

Value

Multiple accessories form a tableside ordering system that reduces operating costs, while efficient and convenient charging enhances management productivity.

A leading software company in South Korea.

“SUNMI is a strategic partner for Korea's F&B digitalization. Enabling unified national store management,empowering truly unattended self-service environments through remote automation.”

—Fastorder CEO

SUNMI Product Used

CPad

Applications

Table-side self-ordering, Backend management, Order tracking, centralized charging.

Value

By integrating multiple accessories and featuring efficient charging, our table-side ordering solution streamlines management and elevates the customer experience.

Food & Beverage

A leading restaurant software company in Malaysia.

“SUNMI 3rdGen product, with all-in-one functionality and sleek compact design, address SMBs' operational pain points through customized ROM, integrated QR payments and SoftPOS, fulfilling their digitalization demands.”

— A manager

SUNMI Product Used

D3 MINI

Applications

Order Checkout, Display Takeout Orders, SoftPOS Transactions.

Value

With compact design and SaaS-Payment integration, empowering SMBs in digital transformation.

A well-known restaurant software provider in the Middle East and Africa.

“Table-side ordering transforms the way patrons place their orders, enhancing the customer experience, with order requests seamlessly integrated with the kitchen, thereby boosting operational.”

— Project manager

SUNMI Product Used

D3 PRO

Application

Ordering and Payment, Operations Management, Data Analysis.

Value

Change the Ordering Process in Restaurants to Enhance Operational Efficiency and Customer Experience.

Food & Beverage

SUBWAY

Subway is the largest single-brand restaurant chain and the largest restaurant operator globally.

“The T3 PRO renowned for its high performance and design, offers a comprehensive digital solution for Subway, helping us enhance work efficiency and improve consumer experience.”

— A store manager, Subway

SUNMI Products Used

T3 PRO, Max Cash Drawer, Printer, Blink ScanBox

Applications

Ordering and checkout, receipt printing, membership management.

Value

Provided efficient checkout services, helped chain brands manage multiple stores easily.

POPEYES

An American multinational chain of fried chicken fast food restaurants with over 3000 restaurants in 25 countries.

“The adoption of SUNMI Kiosk in self-ordering and facial recognition payment has shortened checkout lines and saved us a lot of time.”

— A waiter, Popeyes Flagship, Shanghai

SUNMI Product Used

SUNMI K2

Applications

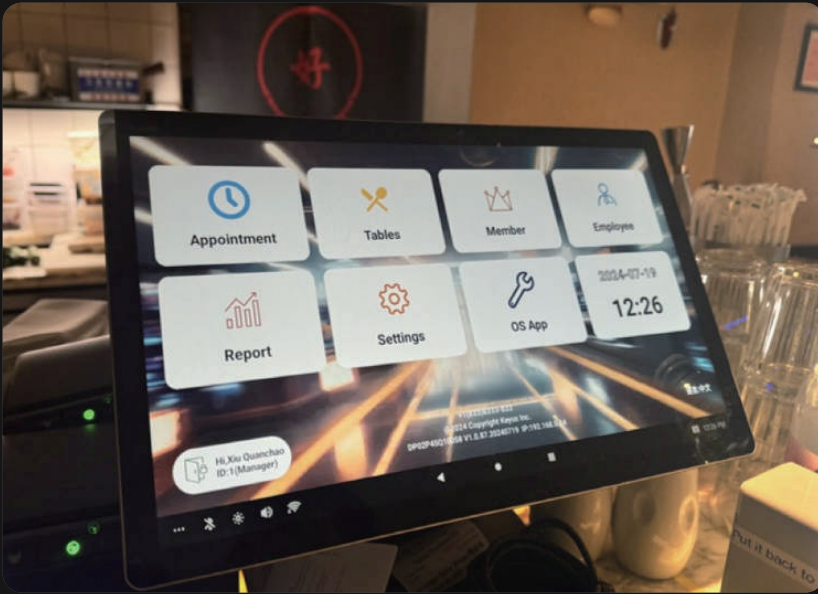

Self-ordering and self-checkout.

Value

Shortened waiting lines, reduced checkout workload and improved store operational efficiency.

Food & Beverage

A high-end Chinese restaurant brand by the Haidilao Group, aimed at the American markets.

“The D3 PRO and P3 MIX can better provide tableside ordering and payment services, enhancing the dining experience for customers.”

— A store manager, Hao Noodle

SUNMI Products Used

D3 PRO, P3 MIX

Applications

Mobile ordering, integrated payments, receipt printing, order management, and member marketing, etc.

Value

Enhanced local service experiences to help the brand expand into international markets.

A Malaysian technology company specializing in services for the restaurant industry.

“SUNMI smart POS devices enables restaurant businesses to effortlessly streamline operations, offering a perfect payment solution.”

— CEO of FeedMe

SUNMI Product Used

D3 PRO

Applications

Checkout services, receipt printing; various payment methods supported.

Value

Saved wait time and improved customer experience.

A highly popular new tea brand.

“The T3 PRO enabled AH MA HANDMADE to achieve data-driven management, significantly improving store management efficiency.”

— Business owner of AH MA HANDMADE

SUNMI Product Used

T3 PRO

Applications

Offline ordering, checkout services, receipt printing, transaction processing, and data statistics, etc.

Value

Ensured efficient and stable checkout to boost store efficiency.

Services

SUNMI's 3rd generation products have been widely used in hotels and pubs and book fair event management among other segments to enhance service efficiency and build convenient user experience.

A gaming operator in the Middle East and Africa

“The Sunmi P-Series enables street vendors to conduct mobile lottery sales, enhancing employment opportunities while expanding service coverage.”

—Kenneth Asare, CEO

SUNMI Products Used

P3

Applications

Lottery ticket sale and print, operations management, integrated payment.

Value

Real-time sales monitoring drives cashless payment adoption and stimulates market consumption.

One of the most influential book fairs in the Middle East.

“The V3 MIX revolutionizes transactions with SoftPOS card payments, driving cultural exchanges with an inclusive cashless environment. Its high-definition display delivers vibrant, interactive content, all while maintaining a lightweight and convenient design. Overall audience satisfaction in 2024 increased by 5% compared to last year, reaching an impressive 97%.”

— The book fair organizer

SUNMI Product Used

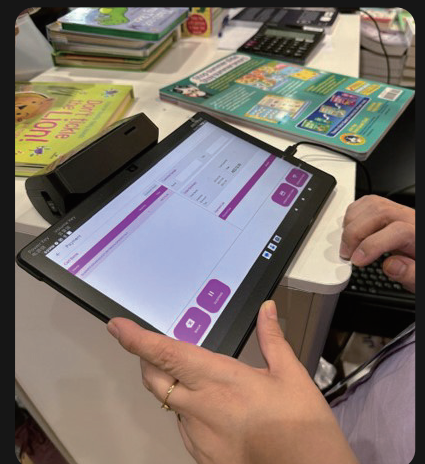

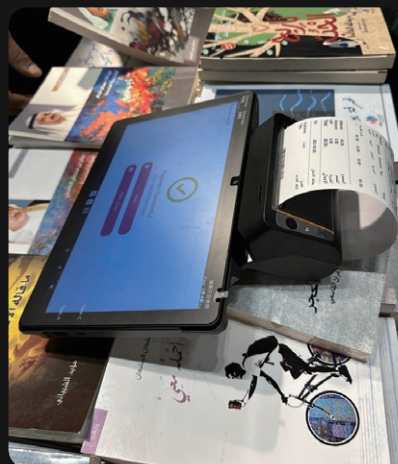

V3 MIX (GMS version)

Application

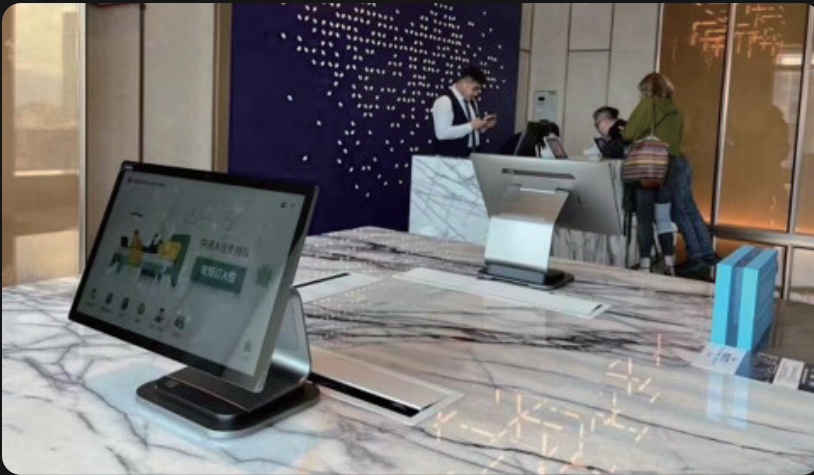

Bill display, SoftPOS transactions, receipt printing.

Value

Enabled diverse payment methods at the UAE's first cashless book fair.

Services

A company dedicated to providing customers with smart hotel SaaS + IoT solutions and intelligent hotel product services.

“With the growth of tourism and diverse customer needs, we collaborated with the SUNMI T3 PRO to provide smart solutions for the hotel industry, optimizing operational processes and offering more convenient and efficient guest services.”

— CEO of LUMOUS

SUNMI Product Used

T3 PRO

Applications

Self-service check-in and check-out, room inquiries, bookings, and other services.

Value

Met various business needs, and effectively reducing recipients' workload. Greatly improved the efficiency of check-in and check-out procedures.

A company dedicated to providing nightclubs with comprehensive smart marketing management solutions for all scenarios.

“The T3 PRO series, renowned for its high performance, offers a comprehensive digital solution for trendy nightclubs, helping us achieve efficient operations and enhance customer satisfaction.”

— A nightclub owner

SUNMI Product Used

T3 PRO

Application

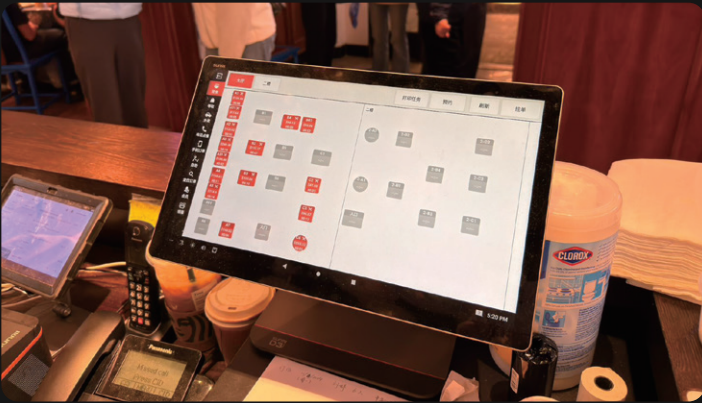

Reservation management, bottle keep management, order tracking, SCRM, inventory management, financial management, and marketing planning.

Value

Provided efficient checkout services, report analysis, and inventory control to help bars optimize management and operations.

Online/Offline Integration Becomes a Global Trend

No physical business will be immune to the impact of COVID-19, but some ache, while some thrive with digital transformation, showing the necessity and great potential of online-offline integration.

SUNMI, thinking outside the box with the deep understanding in the digital economy, brings smart devices to businesses around the globe and creates a service and product system consisting smart devices and End-to-End platform. We continuously optimize our products and enhance hardware sensing capabilities and connectivity, and are dedicated to building an interconnected business world with partners around the world through creating diversified digital solutions for business.

A mode what we call Business 4.0, where enterprises, empowered by comprehensive digitalization, build online and offline integrations and provide consumers omni-channel seamless service experiences, reducing the information gap between those who supply and who consume.

BloT for Business 4.0

In 2020, we officially launched the BloT Strategy.

Through business IoT devices, operating systems and End-To-End Platform, we are leading the move to Android for business digitization solutions with attractive offerings and a full ecosystem.

For SUNMI, BloT is more than Business IoT. We also see the letter B as Business Intelligence (BI): combine BI and IoT products, and work with our partners around the world to empower merchants with online-offline integration, thus to realize an interconnected Business 4.0 world that benefits us all.

"We believe that, enabled by BloT, the interconnection of more smart things will bring more profound revolutions to the society."

— Jack Lin, Founder and CEO of SUNMI
