HOLISTIC APPROACH

GIFT CARD GLOBAL EXPERTS

CUSTOMIZATION

All capabilities within the platform are configurable and parameter driven. They can be switched off or on to provide customers with unique experiences.

FLEXIBILITY

Our singular focus on stored value allows us to innovate and bring new functionality to the platform quickly and deploy desirable features to our clients.

INTEGRATION

The platform is engineered to allow different players (brands, third parties, mobile apps, etc.) to integrate with it in a manner specific to the channel, which allows broad adaptability for the client across channels.

SECURITY

- 24/7 fraud prevention effort
- Agile team dedicated to preventing balance inquiry fraud
- Fraud prevention built into every application

MULTIPLE LAYERS OF PROTECTION

Technology

- Velocity monitoring
- Firewalls
- Security transmissions

Application Design

- Not exposed to the internet
- Anti-fraud architecture

Product Security Best Practices

- PIN requirements
- Secondary security code
- Human readable gift card number
- Proxy gift card number

The latest SVS WBI advanced technology permanently eliminated 750,000 recurring monthly BOT transactions.

Globally, over 1 million people interact with the SVS platform every hour.
