

FOOD CLING FILM  
**RECYCLABLE**

Made from polyethylene (PE), Food Stretch® offers a high-performance alternative to traditional PVC food films, which are harmful to both health and the environment.

Compatible with manual or semi-automatic use, it works seamlessly with sealing tools. At equal thickness its production generates 25% less waste compared to PVC films. A safer and more sustainable choice for food professionals.

FOOD CLING FILM  
**COMPOSTABLE**

Made from compostable polymers, Food Stretch® Compostable offers a high-performance and eco-friendly alternative to traditional food wraps, which are often harmful to both health and the environment. Certified TÜV Austria Home Compost, it is fully biodegradable and compostable.

Compatible with both manual and semi-automatic use, it works perfectly with standard sealing tools.

Steam oven safe*	✓ (max 95°C)	✓
Freezer resistant <i>for both low and deep freezing</i>	✓	✓
Recyclable	✓	✓
Biodegradable and Compostable	X	✓
Disposable with food waste <i>Organic bin compatible</i>	X	✓
PVC-free <i>Contains no chlorine or plasticizers (phthalates)</i>	✓	✓
High adhesive strength	✓	✓
Elastic and flexible	✓	✓
Non-toxic	✓	✓
Colorless	✓	✓
Resistant	✓	✓
Anti-fog properties	✓**	✓
Made In France	✓	✓
TÜV Austria certified <i>Complies with EN 13432 and NF T51-800 standards</i>	X	 

\*limited duration    \*\*Optional on demand

# The dangers of PVC

PVC food wrap poses a health hazard because it releases toxic substances during use, including endocrine disruptors such as bisphenol, barium salts, lead, and dioxins. It is therefore recommended to avoid using it in direct contact with fatty foods, nuts, or under heat, to reduce the risk of these harmful substances transferring into food.

PVC is also highly polluting. It generates a large amount of waste since it is non-recyclable and typically ends up in landfills. It cannot be incinerated, as it releases carcinogenic chlorine compounds during combustion.

## CSR

### FOCUS

Food Stretch® films, available in recyclable and compostable options, are a crucial solution for reducing environmental impact and **achieving your CSR objectives**. Designed to minimize polluting plastic waste, they align with a sustainable approach without compromising on performance. Their non-toxic composition ensures safety when in contact with all foods and during reheating, offering optimal food safety and protecting consumer health. By integrating Food Stretch® into your business, you are reinforcing your ecological commitment and facilitating the attainment of **eco-friendly labels and certifications such as Green Key, Green Globe, Green Star...**

## A TAILOR-MADE PROJECT ?

As a manufacturer, we support you in the development and customization of your products : dimensions, length, logo printing, custom packaging, or white-label creation.
