

Vibrant EcoPack

# PRODUCT CATALOGUE

# Vibrant EcoPack

We are a global food packaging solutions manufacturer dedicated to healthy, low-carbon and environmentally responsible development, supplying sustainable packaging to leading international foodservice and retail brands.

Our nearly 60,000m<sup>2</sup> production base, advanced automated manufacturing lines and Class 1000 cleanroom, together with a professional R&D team, ensure stable quality and continuous innovation in materials, structures and eco-friendly technologies.

We operate under a rigorous international management system with certifications such as ISO9001, ISO14001, BSCI, EUDR, FSSC22000, HACCP and BRCGS, and our products are exported to 150+ countries and regions, supporting sustainable supply and brand enhancement worldwide.

Sustainable packaging from nature – for a greener future worldwide.

## Sustainable Raw Materials

### PLA

Polylactic acid is a polymer obtained by polymerization of lactic acid as the main raw material.

### Paper

Widely used for food packaging applications such as bags, cups, and containers.

### Bamboo

Bamboo has a short growth cycle. After processing, it can maintain the toughness and durability of bamboo. Products made of bamboo are biodegradable.

### Sugarcane pulp

Sugarcane pulp is mainly made of bagasse, which is degradable and compostable. It is a suitable material for making lunch boxes.

# Company Certification

## HACCP

HACCP is an assessment of an enterprise by a professional organization to prove that the enterprise has the ability to stably control food safety hazards.

## BRCGS A<sup>+</sup>

The standard is designed as a "total quality management" program, and includes both Packaging materials requirements and quality requirements.

## BSCI

Trade with purpose

The amfori Business Social Compliance Initiative (BSCI) is an industry-driven movement that aims to monitor and assess workplace standards across the global supply chain.

## Quality Management System Certification

Our integrated quality and environmental management systems are ISO9001:2015 and ISO14001:2015 certified, enabling us to identify key aspects for top-quality service and environmentally impactful areas, and set continuous improvement goals plus an action plan to reach them.

## GMP

GMP is a system of processes, procedures, and documentation that ensures manufactured products are consistently produced and controlled to established quality standards.

## FSSC 22000

A food safety certification program that establishes a framework for food safety management, overall supply chain management, and food safety hazard control.

## FSC

An obvious choice for manufacturers of FSCTM certified card and paper ensuring that the products come from responsibly managed forests. Search for our FSCTM certified products.

## EUDR

The Regulation on Deforestation-Free Products (EUDR) is the EU's response to the role of global trade in driving deforestation and forest degradation.

## HFC

Proves that no ingredients prohibited by Islamic law are used in the production process, and the production process is clean and complies with Muslim dietary taboos.

# Product Certification

## FDA

Indicates compliance with relevant U.S. FDA regulations for food contact materials, ensuring that products are safe for their intended use and manufactured under appropriate quality controls.

## LFGB

The LFGB standard ensures that products coming into contact with food are compliant. This standard is mainly required for Germany. LFGB is based on European directives 76/769/EEC and EC 1935/2004.

## DIN plus

Prove that plastic packaging materials can be effectively recycled through existing recycling systems and that recycling will not negatively impact the quality of the recycled materials.

## OK compost

**INDUSTRIAL:** Verifies that the product biodegrades rapidly in an industrial composting facility.

**HOME:** Verifies that the product decomposes naturally in a home composting environment.

## Seedling

This indicates that the product meets industrial composting standards and can be completely degraded in the high temperature and high humidity environment of a professional composting plant.

## AS 5810

It proves that the product can be biodegraded in a home composting environment, and no harmful substances are released during the degradation process, and it is safe for the soil and ecology.

# CUSTOMIZATION

We know that strong brands win in the market – and packaging is one of the most visible touchpoints. That's why we provide end-to-end customization across our full range of foodservice products, including boxes, trays, cups, cutlery, and containers.

Custom packaging is more than a vessel, it's a marketing asset. With the right design, every order reinforces your brand identity, elevates your professional image, and delivers a consistent customer experience.

From logos, colors, and patterns to structural design, material selection, and packaging specifications, our team works closely with you to create packaging that truly reflects your brand and performs in real-world operations.

Reach out today to request a quote and start creating your custom packaging solution.
